Ensuring Full Text in EndNote (Windows only)

Open EndNote Preferences >> Find Full Text

http://ll3md4hy6n.search.serialssolutions.com

(in the above URL, the first characters are “LL” not “11”)

Be sure that the box for "Automatically invoke Find Full Text" is **not checked** if you do not want EndNote to do this by default.

This Full Text feature preference is used for Windows machines.
